FAISAL REHMAN

Bengaluru, India | +91 9620532473 | faisalshaikhrehmani@gmail.com | Faisal Rehman | LinkedIn
PORTFOLIO- Faisal Rehman | AI & Data Science Graduate | Full-Stack Software Developer

PROFESSIONAL SUMMARY

IT graduate with a B.E. in Artificial Intelligence and Data Science and hands-on experience spanning digital advisor, full-stack development, AI-based projects, and cybersecurity fundamentals. Worked as a Digital Advisor on the Email and Social Media team at [24]7.ai in Bengaluru. Builds practical, real-world projects using AI-assisted development tools such as Google Antigravity and Google AI Studio, including a Gemini API-powered personal voice assistant and a hotel management website with table booking and ordering functionality. A fast learner who enjoys solving problems, learning new tools, collaborating with teams, and taking ownership of responsibilities. Interested in technology and software-related opportunities in Dubai.

EDUCATION

B.E. in Artificial Intelligence and Data Science | Navkis College of Engineering, affiliated with Visvesvaraya Technological University | 2025 | CGPA: 7.9/10

CORE SKILLS

Programming & Data: Python, Java, SQL, MySQL

AI & Data Science: Generative AI, Gemini API, prompt engineering, machine learning fundamentals, TensorFlow, Keras, Scikit-learn, Pandas, Matplotlib, Seaborn

Development: Full-stack development fundamentals, web development, .NET, UI/UX design, API integration

Tools: Google AI Studio, Google Antigravity, Jupyter, Tableau, Power BI, Jira, Salesforce, Confluence, Lucidchart, MS Project, Microsoft Office

Professional: Problem-Solving, Analytical Thinking, Debugging and Troubleshooting, Technical Documentation, Team Collaboration, Agile Teamwork, Project Coordination, Adaptability, Critical Thinking, Continuous Learning.

PROFESSIONAL EXPERIENCE

Digital Advisor — Email and Social Media Team | [24]7.ai | Bengaluru, India | *Sept 26 2025 – Dec 10 2026*

- Supported customer interactions through email and social media channels in a digital customer service environment.
- Focused on clear written communication, professional email etiquette, and customer-oriented responses.
- Built experience working within team processes, adapting to customer needs, and taking responsibility for assigned tasks.

Full-Stack Development Intern | CifTech Solutions Pvt. Ltd. | Bengaluru, India | *2024 (2024–2025)*

- Developed a Hospital Management System project using .NET and MySQL.
- Applied full-stack development and database concepts to a practical healthcare workflow.
- Gained experience with project planning, implementation, debugging, and delivering a functional software solution.

Cybersecurity Intern | National Information and Cyber Security Council (NICC) | *25 Oct 2023 – 24 Nov 2023*

- Completed training in web application Vulnerability Assessment and Penetration Testing (VAPT).
- Practised networking fundamentals, web application scanning, vulnerability analysis, and penetration-testing concepts.
- Learned about common cyber threats, defensive measures, and responsible security practices.

Soft Skills & Microsoft Office Trainee | 10 Seconds | *Jul 2022 – Aug 2022*

- Developed workplace communication, time management, organization, and collaboration skills.
- Practiced document formatting in Word, data entry and analysis in Excel, and presentation creation in PowerPoint.

CERTIFICATIONS & TRAINING

- Cyber Security Internship & Training — **National Information and Cyber Security Council (NICC)**
- Soft Skills & Microsoft Office Training — **10 Seconds**
- IEEE Project Expo 2025 Participant — **IEEE CEDA Bangalore Chapter**
- Mini Project Expo 2024 Participant — **Department of IT, Navkis College of Engineering**
- CifTech Solutions Internship — **Academic Internship (2024)**

- ChatGPT for Everyone — **GUVI**
- AI Tools and ChatGPT Workshop — **be10X**
- Computing Skills for Business — **atingi**

PROJECTS

- **Car Parking Management System:** Developed a full-stack application for managing parking operations using web development and database technologies.
- **Self and Manual Driven Rover:** Developed an IoT-based rover project focused on rover control and functionality.
- **Loan Eligibility Prediction:** Built an academic machine learning project using deep learning techniques to predict loan eligibility.
- **Heart Rate Monitoring and Stress-Level Prediction using rPPG:** Developed a major academic project focused on heart-rate monitoring and stress-level prediction using remote photoplethysmography (rPPG).
- **Healthcare and Hospital Management System:** Developed a full-stack hospital management application during an internship at CifTech Solutions Pvt. Ltd., using **.NET and MySQL**.
- **Finance Tracking Wallet:** Developed a full-stack application designed to track and manage financial activities.
- **Personal AI Voice Assistant:** Built a personal voice assistant integrated with the **Gemini API**, enabling voice-based interaction and AI-generated responses. Explored AI integration using **Google AI Studio and Google Antigravity**.
- **Hotel Management Website:** Developed a website with **table booking and food ordering features**, focusing on user interaction and online service management.
- **Additional AI-Based Projects:** Explored practical AI applications using the **Gemini API, Google AI Studio, Google Antigravity, and prompt engineering** techniques.

TECHNICAL EVENTS

IEEE Project Expo 2025: IEEE CEDA; participated in a technical project exhibition in association with the IEEE Bangalore Section and Mysore Subsection.

Mini Project Expo 2024: Department of IT, Navkis College of Engineering, Hassan; presented a technical project and engaged with evaluators and peer teams.

LANGUAGES

English, Hindi, Kannada

INTERESTS

Building real-world software and AI projects, personal coding projects, game development, competitive programming, photography, graphic design, fitness, public speaking, and travel.
